

# AF Protector

## Fund Fact Sheet - Retail Investor

### AFRIS Range

December 2024

**Launch date**  
June 2015

**Fund size**  
R 1.5 billion

**Fund description**  
Combined - Multi asset class - Specialist

#### Background

THIS PORTFOLIO PRICING IS ONLY AVAILABLE FOR THE RETIREMENT INCOME SOLUTION

#### Portfolio description

The AF Protector Fund is a global Reg. 28 compliant goals-based solution with 3 integrated objectives:

1. Protect the expected income replacement value of the accumulated retirement savings for retirement;
2. Protect the capital value of the retirement savings over 24 month periods;
3. Maximise real returns whilst achieving objectives 1 and 2

The investment strategy is a specialist asset allocation approach implemented through multi management framework. Portfolio construction and strategy selection is primarily towards minimizing the risk of not meeting the future expected liabilities (the inflation linked income stream).

The fund is well diversified and primarily invested in traditional asset class portfolios. Alternate investment strategies such as hedge funds will be selected for additional capital protection.

**Notes**

- Total Expense Ratio (TER): The percentage of the value of the portfolio that was incurred as expenses relating to the administration (charges, levies and fees) of the portfolio. TER is calculated over a rolling three year period (or since inception where applicable) and annualised to the most recently completed month. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TERs. Transaction cost (TC): The percentage of the value of the portfolio that was incurred as costs relating to the buying and selling of the assets underlying the portfolio. Transaction costs are a necessary cost in administering the Fund and impacts returns. It should not be considered in isolation as returns may be impacted by many other factors over time, including market returns, the type of financial product, the investment decisions of the investment manager and the TER. Calculations are based on actual data where possible and best estimates where actual data is not available. Total investment charge (TIC): This percentage of the portfolio was incurred as costs relating to the investment of the portfolio. It is the sum of the TER and TC.
- Market data is sourced from Datastream. The FTSE/JSE Africa Index Series is calculated by FTSE International Limited ("FTSE") in conjunction with the JSE Securities Exchange South Africa ("JSE") in accordance with standard criteria. The FTSE/JSE Africa Index Series is the proprietary information of FTSE and the JSE.
