

# AF Passive Protector

## Fund Fact Sheet - Retail Investor

AFRIS Range

February 2025

**Launch date**  
August 2016

**Fund size**  
R 36.8 million

**Fund description**  
Combined - Multi asset class - Passive

### Background

THIS PORTFOLIO PRICING IS ONLY AVAILABLE FOR THE RETIREMENT INCOME SOLUTION

### Portfolio description

The primary objective of a retirement fund is to replace one's salary on retirement. A Net Replacement Ratio (NRR) is used to measure the percentage of final pensionable salary that can be obtained by purchasing an annuity that will provide a guaranteed inflation-linked income stream for life. An NRR of between 60%-75% is generally accepted to provide the required income for most people to maintain their existing lifestyles. This may vary from individual to individual, depending on his/her needs and circumstances. An AF LifeStage retirement solution is a dynamic investment strategy designed towards achieving this objective. The AF LifeStage solution has 2 distinct phases: Accumulation of assets (30-40 years), and preparing towards retirement (5-7 years prior). The AF Passive Protector Fund is designed for the preparation for retirement phase.

### Risk profile

### Value of R100 invested since inception

## Notes

- Total Expense Ratio (TER): The percentage of the value of the portfolio that was incurred as expenses relating to the administration (charges, levies and fees) of the portfolio. TER is calculated over a rolling three year period (or since inception where applicable) and annualised to the most recently completed month. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TERs. Transaction cost (TC): The percentage of the value of the portfolio that was incurred as costs relating to the buying and selling of the assets underlying the portfolio. Transaction costs are a necessary cost in administering the Fund and impacts returns. It should not be considered in isolation as returns may be impacted by many other factors over time, including market returns, the type of financial product, the investment decisions of the investment manager and the TER. Calculations are based on actual data where possible and best estimates where actual data is not available. Total investment charge (TIC): This percentage of the portfolio was incurred as costs relating to the investment of the portfolio. It is the sum of the TER and TC.
- Market data is sourced from Datastream. The FTSE/JSE Africa Index Series is calculated by FTSE International Limited ("FTSE") in conjunction with the JSE Securities Exchange South Africa ("JSE") in accordance with standard criteria. The FTSE/JSE Africa Index Series is the proprietary information of FTSE and the JSE. All copyright subsisting in the FTSE/JSE Africa Index Series index values and constituent lists vests in FTSE and the JSE jointly. All their rights are reserved.
- All holdings information is based on latest available data.
- There may be differences in totals due to rounding.
- Kindly note that with effect from 1 April 2017, all Alexander Forbes Investments South African equity benchmarks have changed from the FTSE/JSE SWIX to the FTSE/JSE Capped SWIX ALSI Index.
- All returns quoted are before the deduction of all fees charged. Returns for periods exceeding one year are annualized and all returns are quoted in Rands. Past investment returns are not indicative of future returns.
