AF Passive Bold

Fund Fact Sheet - Retail Investor

AFRIS Range

December 2025

Launch date
December 2012

Fund size
R 7.7 billion

Fund description
Combined - Multi asset class - Passive

Background

THIS PORTFOLIO PRICING IS ONLY AVAILABLE FOR THE RETIREMENT INCOME SOLUTION

Portfolio description

The primary objective of a retirement fund is to replace one's salary on retirement. A Net Replacement Ratio (NRR) is used to measure the percentage of final pensionable salary that can be obtained by purchasing an annuity that will provide a guaranteed inflation-linked income stream for life. An NRR of between 60%-75% is generally accepted to provide the required income for most people to maintain their existing lifestyles supported by their salaries. This may vary from individual to individual, depending on his/her needs and circumstances.

An AF LifeStage retirement solution is a dynamic investment strategy designed towards achieving this objective. The AF LifeStage solution has 2 distinct phases: Accumulation of assets (30-40 years), and preparing towards retirement (5-7 years prior to retirement). The AF Passive Bold portfolio is designed for the accumulation phase of retirement savings. It has been designed to be part of the AF Passive LifeStage retirement solution.

FAIS notice and disclaimer

Notes

1. Total Expense Ratio (TER): The percentage of the value of the portfolio that was incurred as expenses relating to the administration (charges, levies and fees) of the portfolio. TER is calculated over a rolling three year period (or since inception where applicable) and annualised to the most recently completed month. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TERs. Transaction cost (TC): The percentage of the value of the portfolio that was incurred as costs relating to the buying and selling of the assets underlying the portfolio. Transaction costs are a necessary cost in administering the Fund and impacts returns. It should not be considered in isolation as returns may be impacted by many other factors over time, including market returns, the type of financial product, the investment decisions of the investment manager and the TER. Calculations are based on actual data where possible and best estimates where actual data is not available. Total investment charge (TIC): This percentage of the portfolio was incurred as costs relating to the investment of the portfolio. It is the sum of the TER and TC.
